Know the Purpose

Functionality - One of the most popular reasons to remodel is to improve the layout and function of your space. Removal of a wall or doorway can create an open floor plan and the illusion of a larger space.

Update A Tired Look - Does your home need a refreshing new look to replace outdated trends? Some of these needed updates may include a fresh coat of paint, tall cabinets, new backsplash, and excess lighting.

Our design team will make sure that your home stays up to date for many years to come!

Design Development

During the design phase, there will be a significant amount of collaboration. The first step is a visit from a crew member to acquire thorough measurements. With these measurements, we create a floor plan of your existing space. We use these floor plans to develop proposed design ideas of your project.

This is the time we walk through the selection of materials and finishes such as cabinet layout, lighting, tile, etc. You will work with a designer at some of our partnered showrooms to guide you through the process of material selection.

We work out every detail to address all your needs. We will create a 3-D rendering of your project to help you visualize your selections. This will ensure that all your needs are met and gives you the opportunity to view your project in its completed state before construction even begins!

Investment Value - Do you plan on selling your home and want to get top dollar for your investment? Adding features that make your home stand out among the rest is crucial for receiving multiple offers on your listing! Added square footage, an open concept, and tasteful finishes that appeal to the masses are all great options.

***Pro-Tip**

Did you know that many home renovations qualify as tax deductible capital investments? Contact your accountant today and find out which improvements qualify!

Project Development

A great remodel is accomplished in the details. In this phase, we will update the set of plans to meet your specifications given by the design team. Upon signing the build contract and submitting the initial payment, our team will submit the plans to your local municipality. Lastly, our team of preferred subcontractors will perform a walkthrough of your project.

When you choose Everbuild Contractors, you not only purchase a smooth process, but you also purchase top-tier quality. Our reputation shows that we are dedicated to the fine details and respect your investment.

Our team of preferred subcontractors whom we use are highly experienced professionals. You can relax confidently throughout our proven process, knowing that you are in good hands. We promise to be there with you every step of the way!

Constructions ◀

This phase is the most time-consuming and by far the most exciting! We begin by installing dust barriers and protective materials to safeguard you and your home.

Demolition day can be disruptive and annoying, so be sure to schedule accordingly!

Now, to bring your design dreams to life. Our team of very skilled and highly qualified tradesmen will begin crafting your space.

We guarantee exceptional communication and quick problem-solving to keep your project running smoothly!

What Our Clients Are Saying

One of the most ethical, hard-working professional & honest contractors I've dealt with.

I couldn't be more happy with how it turned out, and the best part was my house sold TWO HOURS after I listed it!!

They remodeled our entire kitchen and downstairs...punctual with good communication and great craftsmanship!
